

Anki Garden economy and balance review

Current economy, progression, rewards, purchases, and earnable items - analysis only

EXECUTIVE ASSESSMENT

The system is mechanically coherent, but its value varies sharply by review speed, volume, and completion behavior.

One currency, rating-neutral Growth, exact routing, finite drop guarantees, and atomic transactions form a strong base. The largest balance risks are timed-consumable speed scaling and an endgame that can accumulate large Stored Growth after every plant reaches Full Bloom. Several checked-in analysis/doc sources also lag the runtime and should not guide tuning without reconciliation.

HIGH RISK

Timed Fertilizer fairness

10x

Basic yields 1 Growth/Coin at 30 cards/hour and 10 at 300; Quality and Magical span 1.2 to 12.

HIGH RISK

Endgame saturation

1.27M

Stored Growth after one year at 400 cards/day in the bounded baseline; 200/day leaves 410,502.

WATCH

Completion Coin share

34-55%

Today's Cards supplies the largest recurring faucet across modeled volumes and strongly shapes affordability.

WATCH

Find cap scaling

0.75 vs ~2

Finds per 100 cards at 400/day versus 25-100/day; the three-per-day cap compresses high-volume value.

HEALTHY

Value protection

No loss

Overflow routes onward or to Stored Growth; rating choice never changes ordinary Growth; failed writes roll back.

UNKNOWN

Live pacing target

No telemetry

Actual speed, completion, spending, and perceived rarity are unknown, so normative tuning remains open.

Scope boundary

Snapshot main @ 9081a52, schema 25, clean source tree. No price, probability, reward, state, package, or UI changes are made or recommended as replacement values in this report.

System loop and source authority

Observed runtime contracts are separated from modeled outcomes and target-dependent judgments

CORE ECONOMY LOOP

Independent reward branch

Every new eligible card also checks the Standard Find pool and each incomplete environment tier. Committed outcomes can add Coins, Instant Growth, consumables, or permanent environment ownership without rerolling on retry, sync, undo lineage, or rerender.

FIVE VALUE CONCEPTS

Garden Coins	Only spendable currency; earned from daily, completion, streak, achievement, milestone, effect, and Find sources.
Answer Growth	Per-card calculation with active modifiers; full value goes to the nurtured lane.
Shared Growth	Each other planted bed creates a separate 20% share; aggregate output reaches 200% with six beds.
Instant Growth	Fixed Find, Charge, or completion value; no modifiers and no Shared fan-out.
Stored Growth	Unbounded holding value for any amount that no unfinished planted target can accept.

AUTHORITY AND INTEGRITY

Engine/state	GardenGameEngine, exact-unit Growth contracts, schema-25 state, catalog registries.
Durability	SQLite reward ledger plus optimistic state revision and atomic snapshot/ledger rollback.
Purchases	Quote -> fingerprint -> fresh quote -> stale checks -> debit/grant -> atomic save.
Sync	Only unseen post-activation answers are consumed; closed historical loadouts are not guessed.
Presentation	HUD, summaries, and Collection render committed facts; they are not economic authority.

Progression, streaks, and Shared Growth

Exact stage thresholds and deterministic output multipliers

PLANT STAGES AND REWARD POOLS

Stage	Growth	Base cards	25/50/75/finish	Coins
Seed	0	0	-	0
Sprout	500	50	1/1/1/2	5
Young	2,500	250	2/2/2/4	10
Mature	8,000	800	4/4/4/8	20
Flowering	20,000	2,000	7/7/7/14	35
Full Bloom	50,000	5,000	10/10/10/20	50

STREAK TIERs

Day 1+	+0% of base
Day 7+	+5% of base
Day 14+	+10% of base
Day 30+	+15% of base
Day 100+	+20% of base
Day 365+	+25% of base

BED OUTPUT WHILE ANY PLANT IS UNFINISHED

VALUE PROTECTION

- Primary Growth fills the intended plant, then other unfinished planted plants in slot order.
- Every other planted plant creates one exact 20% Shared lane, including Full Bloom sources.
- Full Bloom shares redistribute across unfinished plants; fractions remain in hundredth units.
- Any final remainder becomes Stored Growth. Full Bloom also grants one Small Growth Charge.

Milestone summary

A complete plant yields 120 base Coins across 20 checkpoint/stage payouts. Autumn Hearth carries fractional 50% bonuses and produces 180 Coins per completed plant. At base 10 Growth/card, Full Bloom requires 5,000 cards before modifiers, Finds, Charges, or Shared output.

Garden Coin faucets and sinks

One currency, flat daily rewards, finite permanent unlocks, and repeatable consumables

DETERMINISTIC AND PROBABILISTIC SOURCES

Coin source	Amount	Rule
First eligible card	+2	Once per active Anki day
Today's Cards	+10	Once after verified collection-wide completion
Every seventh streak day	+10	Day 7 is the 7-Day achievement payout; later cycles recur
Plant milestones	120/plant	180 with Autumn Hearth; 25/50/75/finish payouts
Achievements	1,440 max	Includes Century Day at 100 cards/day
Standard Finds	2.32/Find	Nominal weighted Coin expectation before guarantee bias
Harvest Bell	+5	Each Today's Cards completion while its bonus is locked

PERMANENT SINKS

Category	Coins	Notes
Species	2,950	One chosen starter is free
Beds 3-6	1,750	Sequential permanent capacity
Paid Decorations	875	Four permanent bonuses
Paid Scenery	2,700	Four permanent settings/effects
List total	8,275	Before free starter
Actual basket	7,675-8,175	Depends on starter price

365-DAY GROSS COINS AND TODAY'S CARDS SHARE

INTERPRETATION

- Completion contributes 34-55% of modeled gross Coins; it is the dominant recurring faucet.
- Flat daily rewards make Coins per 100 cards fall sharply as volume rises.
- At 100 cards/day, the fixed policy completes all modeled permanent Coin unlocks on day 348.
- At 25 or 50 cards/day, the same basket remains incomplete after one perfect year.
- After permanent completion, only Fertilizer and Charges remain as sinks; no-spend recurring surplus models about 5.1k-7.8k Coins/year.

Transaction history shown in the UI is bounded to the newest 500 currency rows. It is suitable for recent receipts, not lifetime empirical inflation analysis. The report therefore models source code rather than claiming observed player spending.

Complete purchasable catalog

Permanent purchases and repeatable Coin sinks; one unit per transaction

PLANTS - ANY ONE STARTER IS FREE

Plant	Coins	Economic role
Bonsai	100	Permanent plant; mechanics identical
Rose	100	Permanent plant; mechanics identical
Sunflower	150	Permanent plant; mechanics identical
Lavender	200	Permanent plant; mechanics identical
Hydrangea	250	Permanent plant; mechanics identical
Peony	300	Permanent plant; mechanics identical
Foxglove	350	Permanent plant; mechanics identical
Japanese Maple	400	Permanent plant; mechanics identical
Wisteria	500	Permanent plant; mechanics identical
Dahlia	600	Permanent plant; mechanics identical

PAID BEDS

Unlock	Coins	Economic role
Bed 3	150	Raises capacity to 3; +20% potential garden output
Bed 4	300	Raises capacity to 4; +20% potential garden output
Bed 5	500	Raises capacity to 5; +20% potential garden output
Bed 6	800	Raises capacity to 6; +20% potential garden output

REPEATABLE GROWTH ITEMS

Item	Coins	Effect
Basic Fertilizer	30	+1 Growth/card for 1h
Quality Fertilizer	100	+2 Growth/card for 2h
Magical Fertilizer	300	+3 Growth/card for 4h
Small Growth Charge	30	+100 Instant Growth
Standard Growth Charge	125	+500 Instant Growth

PAID DECORATIONS

Decoration	Coins	Garden Bonus
Wind Chime	100	Every 10 eligible card answers: +1 Growth.
Harvest Bell	175	+5 Coins when today's cards are complete.
Watering Station	250	Every 5 eligible card answers: +1 Growth.
Herbalist's Hourglass	350	Booster Potions provide 25 percent more Booster cards.

PAID SCENERY

Scenery	Coins	Locked effect
Spring Bloom	400	+1 Growth on your first 25 cards each Anki day.
Golden Summer	600	+1 Growth on every second card among your first 100 each Anki day.
Autumn Hearth	500	+50% Coins from plant checkpoints and stage completion.
Snow-Covered Garden	1200	Gain 1 Small Growth Charge when today's cards are complete.

Starter choice has a hidden 500-Coin opportunity-cost spread: mechanically identical Dahlia saves 500 versus free Bonsai or Rose. Purchases do not auto-equip; revalidation and rollback protect both Coins and granted value.

Complete earnable and free catalog

Standard Finds, achievements, defaults, drop environments, and compatibility-only retained value

STANDARD GARDEN FINDS - NOMINAL REWARD SHARE

Find	Tier	Reward	Share
Coin Sprout	Common	+2 Garden Coins	18%
Garden Pouch	Common	+4 Garden Coins	17%
Morning Dew	Common	+40 Growth	20%
Sun Patch	Common	+60 Growth	15%
Hidden Coin Cache	Uncommon	+8 Garden Coins	9%
Growth Burst	Uncommon	+100 Growth	9%
Charged Seed	Uncommon	+1 Small Growth Charge	6%
Buried Coin Cache	Rare	+20 Garden Coins	2%
Rich Compost	Rare	+1 Rich Compost	1.5%
Bottled Rain	Rare	+1 Booster Potion	1.5%
Root Core	Exceptional	+1 Standard Growth Charge	0.6%
Garden Treasury	Exceptional	+40 Garden Coins	0.4%

ACHIEVEMENTS

Achievement	Requirement	Reward
7-Day Anki Streak	7-day Anki streak.	10 Coins
30-Day Anki Streak	30-day Anki streak.	100 Coins + 1 Small Charge
100-Day Anki Streak	100-day Anki streak.	300 Coins
365-Day Anki Streak	365-day Anki streak.	1000 Coins
Century Day	100 cards in one Anki day.	25 Coins
Deep Roots	1,000 cards.	1 Standard Charge
Review Day Complete	today's cards.	5 Coins

FREE, DROP-ONLY, AND COMPATIBILITY COLLECTION ITEMS

Item	Route	Effect/status
Bed 1	Included	20% Shared lane source only when another bed exists
Bed 2	Included	Second planted bed enables 120% aggregate output
Seedling Sign	Included	Cosmetic; no Garden Bonus
Verdant Twilight	Included	Cosmetic Scenery
Booster Potion	Find/gift	+5 Growth for 100/125/150 cards
Grand Growth Charge	Compatibility	+2,000 Instant Growth; no current acquisition
Firefly Lantern	Rare	Every 4 eligible card answers: +3 Growth.
Prism Trellis	Very Rare	Bank 1.5 Growth per eligible card; release it when Today's Cards are complete.
Rainbow Horizon	Rare	+1 Growth on your first 100 cards each Anki day.
Halloween Garden	Very Rare	When today's cards are complete: Small Charge 85%, Standard Charge 10%, or Booster Potion 5%.
Full Moon Garden	Ultra Rare	Every fourth day you complete today's cards, gain 1 Booster Potion; Potions apply to 25 additional cards.
Celestial Eclipse	Ultra Rare	+2 Growth on your first 100 cards each Anki day.

Full Bloom also grants one Small Growth Charge and a permanent plant record. No active achievement rewards avoiding Again.

Chance bands: 1/100 for drought answers 1-40, 1/40 for 41-60, 1/20 for 61-74, then a guaranteed at-least-Uncommon Find on 75. Maximum three per Anki day; the counter pauses at the cap.

Relative item value and payback

Headline cohort: 100 cards/day, 100 cards/hour, Today's Cards completed

REPEATABLE GROWTH/COIN

Item	Coins	30 cards/h	100 cards/h	300 cards/h
Basic Fertilizer	30	1.00	3.33	10.00
Quality Fertilizer	100	1.20	4.00	12.00
Magical Fertilizer	300	1.20	4.00	12.00
Small Growth Charge	30	3.33	3.33	3.33
Standard Growth Charge	125	4.00	4.00	4.00

DAILY GROWTH-EQUIVALENT AT 100 CARDS

Timed value is linear in review speed: Quality and Magical move from 1.2 to 12 Growth/Coin, a 10x spread. Charges remain speed-neutral and therefore define the clearer reference.

PERMANENT-ITEM PAYBACK REFERENCES

Item	Price	Headline value	Reference payback
Wind Chime	100 Coins	10 Growth/day	40 completed days at 4 Growth/Coin
Watering Station	250 Coins	20 Growth/day	50 completed days
Spring Bloom	400 Coins	25 Growth/day	64 completed days
Golden Summer	600 Coins	50 Growth/day	48 completed days
Harvest Bell	175 Coins	+5 Coins/day	35 completed days; direct Coin payback
Autumn Hearth	500 Coins	+60 Coins/plant	9 Full Blooms to exceed price
Snow-Covered	1,200 Coins	100 Growth/day	48 completed days at 4 Growth/Coin
Hourglass	350 Coins	+125 Growth/Booster	12 Booster uses at 4 Growth/Coin

LEGAL STACK CEILING

+35%

Prism Trellis + Celestial Eclipse at 100 cards/day, only when Today's Cards is completed.

+27.5%

Firefly Lantern + Celestial Eclipse without a completion dependency.

These are current legal one-Decoration + one-Scenery stacks; Fertilizer, Booster, and streak can add further value.

365-day progression and affordability scenarios

Bounded repository model; fixed collection-first spending and no purchased consumables

ONE-YEAR OUTCOMES

Cards/day	First Bloom	Plants done	Gross Coins	Completion share	Permanent basket	Stored Growth
10	Not reached	0	6,609	55.2%	Not reached	0
25	159	2	7,168	50.9%	Not reached	0
50	82	4	7,925	46.1%	Not reached	0
100	41	9	9,578	38.1%	348	0
200	22	10	10,538	34.6%	305	410,502
400	12	10	10,676	34.2%	299	1,273,500

FULL BLOOM PACING

SIX-BED ISOLATED GARDEN

Cards/day	First Bloom	All six Bloom	Done at 365
10	-	Not reached	0
25	173	Not reached	2
50	90	257	6
100	46	132	6
200	24	68	6
400	13	35	6

Balance read

Low volume: 10 cards/day does not finish one plant in a year; 25/day finishes two. Middle volume: 100/day finishes nine and pays the permanent basket near year end. High volume: 200-400/day completes the ten-plant roster and creates 410,502-1,273,500 Stored Growth, exposing a clear endgame target shortage rather than lost value.

Model limitation: discovered environments are not equipped, Found/Full Bloom consumables auto-use, one Bonsai is the free starter, and purchase order is fixed. Results are comparative bounds, not player telemetry.

Garden Find and environment distributions

Production resolvers; 60 million Standard-answer trials and 1,000 environment lifecycles

STANDARD FINDS PER 100 ANSWERS - P10 / MEDIAN / P90

Cards/day	P10	Median	P90	Finds/day	Cap use
10	2.05	2.08	2.11	0.21	7%
25	2.05	2.08	2.11	0.52	17%
50	2.04	2.07	2.10	1.03	34%
100	1.94	1.96	1.98	1.96	65%
200	1.46	1.46	1.47	2.93	98%
400	0.75	0.75	0.75	3.00	100%

NOMINAL REWARD VALUE

Outcome	Value	Basis
Coins	2.32	per Standard Find
Direct Growth	26.0	per Standard Find
Small Charge	6.0%	nominal share
Basic Fertilizer	1.5%	nominal share
Booster Potion	1.5%	nominal share
Standard Charge	0.6%	nominal share

Across all seeds, attempted drought never exceeded 74 misses and daily Finds never exceeded three. The 75th attempted drought answer is a guaranteed at-least-Uncommon hit. At 400 cards/day the daily cap, not chance, is the binding constraint.

ENVIRONMENT COLLECTION TIMING - PRODUCTION RESOLVER

Tier	Base	P10 cards	Median	P90	Strict bound	Median days @100
Rare	1/2,500	1,370	4,257	7,666	10,000	43
Very Rare	1/10,000	5,849	17,056	29,303	40,000	171
Ultra	1/25,000	13,034	43,730	74,986	100,000	437
All six	Joint	18,751	43,730	74,986	100,000	437

Accessibility sensitivity

One Ultra item has an exact single-item median of 17,329 cards and a 50,000-card hard guarantee. Two Ultra items have a strict 100,000-card bound. At 10 cards/day that is roughly 4.7 median years for one item and 27.4 years for the strict two-item bound; at 100/day it is 0.47 and 2.74 years; at 400/day it is about 0.12 and 0.68 years.

Natural simultaneous tier hits award the rarest result; simultaneous forced tiers all award, so published hard guarantees remain true upper bounds.

Sensitivity and fairness

How identical catalog values change with speed, attendance, completion, volume, and legal stacking

REVIEW-SPEED SENSITIVITY

Fertilizer	30/h: Growth / G/C	100/h	300/h
Basic Fertilizer	30 / 1.0	100 / 3.3	300 / 10.0
Quality Fertilizer	120 / 1.2	400 / 4.0	1200 / 12.0
Magical Fertilizer	360 / 1.2	1200 / 4.0	3600 / 12.0

ATTENDANCE PATTERN

Pattern	Days	Avg G/card	Result
3 days/week	156	10.0	No 7-day tier
5 days/week	260	10.0	No 7-day tier
7 days/week	365	11.8	Reaches +25%

The timer rewards throughput, not only study volume. A learner completing the same cards more slowly can receive one tenth the Growth/Coin of a fast reviewer.

TODAY'S CARDS SENSITIVITY AT 100 CARDS/DAY

Completion	Annual base Coins	Prism Growth/day	Gift frequency	Interpretation
0% complete	0	0	0	Completion gifts unavailable
50% complete	1,825	75 average	50%	Alternating complete/incomplete days
100% complete	3,650	150	100%	Headline baseline

VOLUME SENSITIVITY

Cards/day	Coins/100	Finds/100	Completion share	Stored at year end
10	181.1	2.08	55%	0
25	78.6	2.08	51%	0
50	43.4	2.07	46%	0
100	26.2	1.96	38%	0
200	14.4	1.46	35%	410,502
400	7.3	0.75	34%	1,273,500

LEGAL STACK READ

- Prism + Eclipse: +350 Growth/day at 100 cards, but Prism releases only on completion.
- Firefly + Eclipse: +275/day without a completion dependency.
- Hourglass + Full Moon: newly used Boosters reach 150 cards (+750 Growth total).
- Only one Garden Bonus and one Scenery may apply; visibility never disables the locked effect.

Ranked findings and decision prompts

Evidence-backed review only; no replacement values

HIGH RISK Timed value depends on reviewer speed

Fertilizer ranges from 1-1.2 Growth/Coin at 30 cards/hour to 10-12 at 300, while Charges stay at 3.33-4.

Decision prompt Should paid timed value intentionally reward throughput this strongly?

HIGH RISK Endgame has no Growth target

The 200/day and 400/day baselines finish all ten plants and retain 410,502 and 1,273,500 Stored Growth after one year.

Decision prompt What should long-term Growth accomplish after the current roster is complete?

WATCH Completion dominates Coin income

Today's Cards contributes 34-55% of modeled gross Coins and gates several high-value environment effects.

Decision prompt Is completion meant to be the economy's primary faucet across every volume?

WATCH Find value compresses at high volume

The three-Find daily cap lowers high-volume Finds per 100 cards while low/mid-volume cohorts remain near the uncapped rate.

Decision prompt Should Find cadence be balanced per card, per day, or deliberately both?

WATCH Ultra access spans months to decades

One Ultra item has a 17,329-card median; two have a 100,000-card strict bound. Calendar time changes 40x between 10/day and 400/day.

Decision prompt What calendar horizon should a low-volume learner reasonably expect?

WATCH Some permanent effects age out

Autumn Hearth needs nine Full Blooms to exceed its 500-Coin price and loses future utility when no plants remain; Hourglass requires scarce Booster activations.

Decision prompt Should permanent unlocks remain valuable after collection completion?

HEALTHY Core transactions protect earned value

Growth redirects/stores, failed persistence restores state, purchases re-quote, and reward identities prevent ordinary replay or reroll.

Decision prompt Retain these invariants in any future tuning pass.

UNKNOWN No empirical player distribution

The source cannot reveal actual speed, completion, spending, loadout choice, or perceived rarity. Visible history is also bounded to 500 Coin rows.

Decision prompt Which telemetry-free target or future anonymized evidence should define success?

Integrity watch: completed purchase requests, Growth Charge requests, and visible currency transactions retain only the newest 500 entries. Durable answer/Find authorities are separate, but very old repeatable request replay and lifetime empirical source/sink analysis are not covered by the bounded projection.

Assumptions, discrepancies, and reproducibility

Traceability for the exact source-only snapshot analyzed 2026-08-29T23:26:58Z

KNOWN SOURCE DISCREPANCIES

- 1 The checked-in balance simulator still names Firefly Evening and Rainbow Sunshower; the active catalog uses Firefly Lantern and Prism Trellis with different effects.
- 2 The simulator says forced lower tiers can be pre-empted; the current resolver awards every simultaneously forced hard-pity tier.
- 3 The simulator labels timed Fertilizer as proposed even though wall-clock Fertilizer is active schema-25 behavior.
- 4 Legacy Harvest and a 500-Coin historical cap appear in product docs, but no Legacy Harvest runtime symbol or generic cap exists; historical paths either baseline with no payout or grant the registered bundle.
- 5 Compatibility checks for retention_90, retention_100, and no_lapse remain in engine/capture code but those IDs are absent from the active achievement registry.
- 6 Legacy CARD_EFFECT_SPECS and timed-Booster constants remain migration compatibility, while active Fertilizer is wall-clock and Booster is card-counted.

ASSUMPTIONS

- Source-only internal design audit; no live Anki or personal telemetry.
- Headline cohort is 100 cards per active day, seven days per week, 100 percent Today's Cards completion, and 100 cards/hour.
- The 365-day scenario uses the repository's fixed collection-first policy, automatic use of earned consumables, and no purchased consumables.
- Discovered environments are valued individually and are not equipped in the bounded 365-day baseline.
- Growth-equivalent comparisons use Standard Growth Charge's visible 4 Growth/Coin only as a reference, not a market price.
- Relative findings are not replacement values; telemetry-dependent conclusions remain Unknown.

VALIDATION SUMMARY

- Focused domain tests: 398 passed, 2 skipped.
- Catalog equality: 39 Collection entries plus 7 achievements and 12 Standard Finds accounted for.
- Stochastic evidence: 600 Standard runs and 1,000 environment lifecycles.
- PDF acceptance: two byte-identical builds, pypdf/pdfplumber readback, pdfinfo, and 12-page PNG visual inspection.

Intentionally unrun: live Anki, capture sequence, package rebuild, native/platform UI acceptance, and release approval.
